

# Key Information Document

## Purpose

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

You are about to purchase a product that is not simple and may be difficult to understand.

## Product

Product name	Autocallable Barrier Worst-of Phoenix Certificate Linked to a Basket of Ordinary Shares
Product identifier	ISIN: IT0006751835
PRIP manufacturer	Marex Financial (www.marexfr.com) Call +44 20 8050 3568 or +39 02 3056 9828 for more information.
Competent authority of the PRIP manufacturer	Authorised and regulated by the U.K. Financial Conduct Authority
Date and time of production	19 May 2023 06:50 Rome local time

## 1. What is this product?

Type	English law governed certificates
Term	The product has a fixed term and will be due on 3 September 2025, subject to an early redemption.
Objectives	The product is designed to provide a return in the form of (1) fixed or conditional coupon payments and (2) a cash payment on termination of the product. The timing and amount of these payments will depend on the performance of the <b>underlyings</b> . If, at maturity, the <b>final reference price</b> of the <b>worst performing underlying</b> has fallen to or below its <b>barrier price</b> , the product may return less than the <b>product notional amount</b> or even zero. <b>Early termination following an autocall:</b> The product will terminate prior to the <b>maturity date</b> if, on any <b>autocall observation date</b> , the <b>reference price</b> of the <b>worst performing underlying</b> is above the relevant <b>autocall barrier price</b> . On any such early termination, you will on the immediately following <b>autocall payment date</b> receive, in addition to any final coupon payment, a cash payment equal to the autocall payment of EUR 1,000.00. No coupon payments will be made on any date after such <b>autocall payment date</b> . The relevant dates and <b>autocall barrier prices</b> are shown in the table(s) below.

(Terms that appear in bold in this section are described in more detail in the table(s) below.)

Autocall observation dates	Autocall barrier prices	Autocall payment dates
24 May 2023	100.00%*	2 June 2023
24 August 2023	98.00%*	4 September 2023
24 November 2023	96.00%*	5 December 2023
26 February 2024	94.00%*	6 March 2024
24 May 2024	92.00%*	4 June 2024
26 August 2024	90.00%*	4 September 2024
25 November 2024	88.00%*	4 December 2024
24 February 2025	86.00%*	5 March 2025
26 May 2025	84.00%*	4 June 2025
25 August 2025	82.00%*	Maturity date

\* of the initial reference price of the relevant underlying.

**Coupon:** On 5 December 2022 you will receive a coupon payment of EUR 120.00. This coupon payment is not linked to the performance of the **underlyings**. If the product has not terminated early, on each **coupon payment date** from and including 7 March 2023 you will receive a conditional coupon payment of EUR 10 together with any previously unpaid coupon payments if the **reference price** of the **worst performing underlying** is at or above its **coupon barrier price** on the immediately preceding **coupon observation date**. If this condition is not met, you will receive no coupon payment on such **coupon payment date**. The relevant dates are shown in the table(s) below.

Coupon observation dates	Coupon payment dates
-	5 December 2022
24 February 2023	7 March 2023
24 May 2023	2 June 2023
24 August 2023	4 September 2023
24 November 2023	5 December 2023
26 February 2024	6 March 2024
24 May 2024	4 June 2024
26 August 2024	4 September 2024
25 November 2024	4 December 2024
24 February 2025	5 March 2025
26 May 2025	4 June 2025
25 August 2025	Maturity date

**Termination on the maturity date:** If the product has not terminated early, on the **maturity date** you will receive:

- if the **final reference price** of the **worst performing underlying** is above its **barrier price**, a cash payment equal to EUR 1,000.00; or
- if the **final reference price** of the **worst performing underlying** is at or below its **barrier price**, a cash payment directly linked to the performance of the **worst performing underlying**. The cash payment will equal (i) the **product notional amount** multiplied by (ii) (A) the **final reference price** of the **worst performing underlying** divided by (B) its **strike price**.

Under the product terms, certain dates specified above and below will be adjusted if the respective date is either not a business day or not a trading day (as applicable). Any adjustments may affect the return, if any, you receive.

The product terms also provide that if certain exceptional events occur (1) adjustments may be made to the product and/or (2) the issuer may terminate the product early. These events are specified in the product terms and principally relate to the **underlyings**, the product and the issuer. The return (if any) you receive on such early termination is likely to be different from the scenarios described above and may be less than the amount you invested.

When purchasing this product during its lifetime, the purchase price may include accrued coupon on a pro rata basis.

You do not have any entitlement to a dividend from any of the **underlyings** and you have no right to any further entitlement resulting from any such **underlying** (e.g., voting rights).

<b>Underlyings</b>	Ordinary shares of Stellantis NV (STLAP; ISIN: NL00150001Q9; Bloomberg: STLAP FP Equity), Enel SpA (ENEL; ISIN: IT0003128367; Bloomberg: ENEL IM Equity) and Assicurazioni Generali SpA (G; ISIN: IT0000062072; Bloomberg: G IM Equity)	<b>Reference price</b>	The closing price of an <b>underlying</b> as per the relevant <b>reference source</b>
<b>Underlying market</b>	Equity	<b>Reference sources</b>	<ul style="list-style-type: none"> <li>• STLAP: Euronext Paris</li> <li>• ENEL: Euronext Milan</li> <li>• G: Euronext Milan</li> </ul>
<b>Product notional amount</b>	EUR 1,000.00	<b>Final reference price</b>	The <b>reference price</b> on the <b>final valuation date</b>
<b>Product currency</b>	Euro (EUR)	<b>Initial valuation date</b>	24 August 2022
<b>Underlying currencies</b>	<ul style="list-style-type: none"> <li>• STLAP: EUR</li> <li>• ENEL: EUR</li> <li>• G: EUR</li> </ul>	<b>Final valuation date</b>	25 August 2025

<b>Initial reference price</b>	<ul style="list-style-type: none"> <li>• STLAP: EUR 14.174</li> <li>• ENEL: EUR 4.945</li> <li>• G: EUR 14.87</li> </ul>	<b>Coupon barrier price</b>	60.00% of the <b>initial reference price</b>
<b>Strike price</b>	100.00% of the <b>initial reference price</b>	<b>Worst performing underlying</b>	For a given date, the <b>underlying</b> with the worst performance between the <b>initial reference price</b> and the relevant <b>reference price</b>
<b>Barrier price</b>	60.00% of the <b>initial reference price</b>		

### Intended retail client

The product is intended to be offered to retail investors who fulfil all of the criteria below:

1. they have the ability to make an informed investment decision through sufficient knowledge and understanding of the product and its specific risks and rewards, either independently or through professional advice, and they may have experience of investing in and/or holding a number of similar products providing a similar market exposure;
2. they seek income, expect the movement in the underlyings to perform in a way that generates a favourable return, have an investment horizon of the recommended holding period specified below and understand that the product may terminate early;
3. they accept the risk that the issuer could fail to pay or perform its obligations under the product and they are able to bear a total loss of their investment; and
4. they are willing to accept a level of risk to achieve potential returns that is consistent with the summary risk indicator shown below.

The product is not intended to be offered to retail clients who do not fulfil these criteria.

## 2. What are the risks and what could I get in return?

### Risk indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a very low level, and poor market conditions are unlikely to impact our capacity to pay you.

Inflation erodes the purchasing value of cash over time and this may result in the decline in real terms of any capital reimbursed or interest you may be paid under the investment.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

For detailed information about all risks relating to the product please refer to the risk sections of the prospectus and any supplements thereto as specified in the section "7. Other relevant information" below.

### Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

<b>Recommended holding period:</b>	Until the product is called or matures		
	This may be different in each scenario and is indicated in the table		
<b>Example investment:</b>	EUR 10,000		
<b>Scenarios</b>		<b>If you exit after 1 year</b>	<b>If you exit at call or maturity</b>
<b>Minimum</b>	There is no minimum guaranteed return. You could lose some or all of your investment.		
<b>Stress</b> (product ends after 2 years and 3 months)	<b>What you might get back after costs</b> Average return each year	EUR 3,590 -64.10%	EUR 6,613 -16.51%
<b>Unfavourable</b> (product ends after 2 weeks)	<b>What you might get back after costs</b> Percentage return (not annualised)		EUR 9,913 -0.87%
<b>Moderate</b> (product ends after 2 weeks)	<b>What you might get back after costs</b> Percentage return (not annualised)		EUR 9,913 -0.87%
<b>Favourable</b> (product ends after 2 weeks)	<b>What you might get back after costs</b> Percentage return (not annualised)		EUR 9,913 -0.87%

The favourable, moderate and unfavourable scenarios represent possible outcomes that have been calculated based on simulations using the reference assets' performance over up to 5 past years. In the case of an early redemption, it has been assumed that no reinvestment has occurred. The stress scenario shows what you might get back in extreme market circumstances. This product cannot be easily cashed in. If you exit the investment earlier than the recommended holding period you may have to pay extra costs.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

### 3. What happens if Marex Financial is unable to pay out?

You are exposed to the risk that the issuer might be unable to meet its obligations in connection with the product for instance in the event of bankruptcy or an official directive for resolution action. This may materially adversely affect the value of the product and could lead to you losing some or all of your investment in the product. The product is not covered by any deposit protection scheme.

### 4. What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

#### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different investment periods.

The duration of this product is uncertain as it may terminate at different times depending on how the market evolves. The amounts shown here consider two different scenarios (early call and maturity). In case you decide to exit before the product ends, exit costs may apply in addition to the amounts shown here.

We have assumed:

- EUR 10,000 is invested
- a performance of the product that is consistent with each holding period shown.

	<i>If the product is called at the first possible date, on 2 June 2023</i>	<i>If the product reaches maturity</i>
<b>Total costs</b>	EUR 645	EUR 645
<b>Annual cost impact*</b>	6.83%	3.05% each year

\*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at maturity your average return per year is projected to be 6.46% before costs and 3.40% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

#### Composition of costs

	<b>One-off costs upon entry or exit</b>	<b>If you exit after 1 year</b>
<b>Entry costs</b>	6.45% of the amount you pay when entering this investment. These costs are already included in the price you pay.	EUR 645
<b>Exit costs</b>	0.49% of your investment before it is paid out to you. These costs are already included in the price you receive and are only incurred if you exit before maturity. If an early redemption occurs or if you hold the product until maturity, no exit costs will be incurred.	EUR 49

### 5. How long should I hold it and can I take money out early?

#### Recommended holding period: 2 years and 3 months

The product aims to provide you with the return described under "1. What is this product?" above. However, this only applies if the product is held to maturity. It is therefore recommended that the product is held until 3 September 2025 (maturity).

The product does not guarantee the possibility to disinvest other than by selling the product either (1) through the exchange (if the product is exchange traded) or (2) off-exchange, where an offer for such product exists. No fees or penalties will be charged by the issuer for any such transaction, however an execution fee might be chargeable by your broker if applicable. By selling the product before its maturity, you may receive back less than you would have received if you had kept the product until maturity.

<b>Exchange listing</b>	EuroTLX	<b>Price quotation</b>	Units
<b>Smallest tradable unit</b>	1 unit		

In volatile or unusual market conditions, or in the event of technical faults/disruptions, the purchase and/or sale of the product can be temporarily hindered and/or suspended and may not be possible at all.

### 6. How can I complain?

Any complaint regarding the conduct of the person advising on, or selling, the product can be submitted directly to that person.

Any complaint regarding the product or the conduct of the manufacturer of this product can be submitted in writing at the following address: Marex Financial, 155 Bishopsgate, London, EC2M 3TQ, United Kingdom, by email to: [complaints@marex.com](mailto:complaints@marex.com) or at the following website: [www.marex.com](http://www.marex.com).

### 7. Other relevant information

Any additional documentation in relation to the product, in particular, the issuance programme documentation, any supplements thereto and the product terms are published on [www.certificati.marex.com](http://www.certificati.marex.com), all in accordance with relevant legal requirements. These documents are also available free of charge from Marex Financial, 155 Bishopsgate, London, EC2M 3TQ, United Kingdom. Call +44 (0)208-050-8636 for more information.
