

# Key Information Document

## Purpose

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

You are about to purchase a product that is not simple and may be difficult to understand.

## Product

Product name	Autocallable Barrier Worst-of Certificate Linked to a Basket of Ordinary Shares
Product identifier	ISIN: IT0006754045
PRIIP manufacturer	Marex Financial (www.marexfp.com) Call +44 (0)208-050-3561 for more information.
Competent authority of the PRIIP manufacturer	Authorised and regulated by the U.K. Financial Conduct Authority
Date and time of production	26 May 2023 06:50 Rome local time

## 1. What is this product?

**Type** English law governed certificates

**Term** The product has a fixed term and will be due on 25 January 2024, subject to an early redemption.

### Objectives

(Terms that appear in **bold** in this section are described in more detail in the table(s) below.)

The product is designed to provide a return in the form of a cash payment on termination of the product. The timing and amount of this payment will depend on the performance of the **underlyings**. If, at maturity, the **final reference price** of the **worst performing underlying** has fallen to or below its **barrier price**, the product may return less than the **product notional amount** or even zero.

**Early termination following an autocall:** The product will terminate prior to the **maturity date** if, on any **autocall observation date**, the **reference price** of the **worst performing underlying** is above its **autocall barrier price**. On any such early termination, you will on the immediately following **autocall payment date** receive a cash payment equal to the applicable **autocall payment**. The relevant dates and **autocall payments** are shown in the table(s) below.

Autocall observation dates	Autocall payment dates	Autocall payments
13 July 2023	24 July 2023	EUR 1,315.00
16 January 2024	Maturity date	EUR 1,630.00

**Termination on the maturity date:** If the product has not terminated early, on the **maturity date** you will receive:

- if the **final reference price** of the **worst performing underlying** is above its **barrier price**, a cash payment equal to EUR 1,000.00; or
- if the **final reference price** of the **worst performing underlying** is at or below its **barrier price**, a cash payment directly linked to the performance of the **worst performing underlying**. The cash payment will equal (i) the **product notional amount** multiplied by (ii) (A) the **final reference price** of the **worst performing underlying** divided by (B) its **strike price**.

Under the product terms, certain dates specified above and below will be adjusted if the respective date is either not a business day or not a trading day (as applicable). Any adjustments may affect the return, if any, you receive.

The product terms also provide that if certain exceptional events occur (1) adjustments may be made to the product and/or (2) the issuer may terminate the product early. These events are specified in the product terms and principally relate to the **underlyings**, the product and the issuer. The return (if any) you receive on such early termination is likely to be different from the scenarios described above and may be less than the amount you invested.

You do not have any entitlement to a dividend from any of the **underlyings** and you have no right to any further entitlement resulting from any such **underlying** (e.g., voting rights).

<b>Underlyings</b>	Ordinary shares of QUALCOMM Inc. (QCOM; ISIN: US7475251036; Bloomberg: QCOM UW Equity), Advanced Micro Devices Inc. (AMD; ISIN: US0079031078; Bloomberg: AMD UW Equity), ASML Holding NV (ASML; ISIN: NL0010273215; Bloomberg: ASML NA Equity) and NVIDIA Corporation (NVDA; ISIN: US67066G1040; Bloomberg: NVDA UW Equity)	<b>Reference price</b>	The closing price of an <b>underlying</b> as per the relevant <b>reference source</b>

#### Intended retail client

The product is intended to be offered to retail investors who fulfil all of the criteria below:

1. they have the ability to make an informed investment decision through sufficient knowledge and understanding of the product and its specific risks and rewards, either independently or through professional advice, and they may have experience of investing in and/or holding a number of similar products providing a similar market exposure;
2. they seek income and/or leveraged performance, expect the movement in the underlyings to perform in a way that generates a favourable return, have an investment horizon of the recommended holding period specified below and understand that the product may terminate early;
3. they accept the risk that the issuer could fail to pay or perform its obligations under the product and they are able to bear a total loss of their investment; and
4. they are willing to accept a level of risk to achieve potential returns that is consistent with the summary risk indicator shown below.

The product is not intended to be offered to retail clients who do not fulfil these criteria.

## 2. What are the risks and what could I get in return?

#### Risk indicator

The risk indicator assumes you keep the product until 25 January 2024. The actual risk can vary significantly if you cash in at an early stage and you may get back less. You may not be able to sell your product easily or may have to sell at a price that significantly impacts on how much you get back.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 6 out of 7, which is the second-highest risk class. This rates the potential losses from future performance at a high level, and poor market conditions are very unlikely to impact our capacity to pay you.

Inflation erodes the purchasing value of cash over time and this may result in the decline in real terms of any capital reimbursed.

This product does not include any protection from future market performance so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment.

For detailed information about all risks relating to the product please refer to the risk sections of the prospectus and any supplements thereto as specified in the section "7. Other relevant information" below.

#### Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

<b>Recommended holding period:</b>	Until the product is called or matures	
	This may be different in each scenario and is indicated in the table	
<b>Example investment:</b>	EUR 10,000	
<b>Scenarios</b>	<b>If you exit at call or maturity</b>	
<b>Minimum</b>	There is no minimum guaranteed return. You could lose some or all of your investment.	
<b>Stress</b> (product ends after 8 months)	<b>What you might get back after costs</b> Percentage return (not annualised)	EUR 618 -93.82%
<b>Unfavourable</b> (product ends after 8 months)	<b>What you might get back after costs</b> Percentage return (not annualised)	EUR 5,155 -48.45%
<b>Moderate</b> (product ends after 8 months)	<b>What you might get back after costs</b> Percentage return (not annualised)	EUR 9,733 -2.67%
<b>Favourable</b>	<b>What you might get back after costs</b>	EUR 15,865

(product ends after 8 months)

Percentage return (not annualised)

58.65%

The favourable, moderate and unfavourable scenarios represent possible outcomes that have been calculated based on simulations using the reference assets' performance over up to 5 past years. In the case of an early redemption, it has been assumed that no reinvestment has occurred. The stress scenario shows what you might get back in extreme market circumstances. This product cannot be easily cashed in. If you exit the investment earlier than the recommended holding period you may have to pay extra costs.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

### 3. What happens if Marex Financial is unable to pay out?

You are exposed to the risk that the issuer might be unable to meet its obligations in connection with the product for instance in the event of bankruptcy or an official directive for resolution action. This may materially adversely affect the value of the product and could lead to you losing some or all of your investment in the product. The product is not covered by any deposit protection scheme.

### 4. What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

#### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different investment periods.

The duration of this product is uncertain as it may terminate at different times depending on how the market evolves. The amounts shown here consider two different scenarios (early call and maturity). In case you decide to exit before the product ends, exit costs may apply in addition to the amounts shown here.

We have assumed:

- EUR 10,000 is invested
- a performance of the product that is consistent with each holding period shown.

	<i>If the product is called at the first possible date, on 24 July 2023</i>	<i>If the product reaches maturity</i>
<b>Total costs</b>	EUR 347	EUR 347
<b>Cost impact*</b>	4.61%	3.50%

\*This illustrates the effect of costs over a holding period of less than one year. This percentage cannot be directly compared to the cost impact figures provided for other PRIIPs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

#### Composition of costs

	<b>One-off costs upon entry or exit</b>	<b>If you exit after 8 months</b>
<b>Entry costs</b>	3.47% of the amount you pay when entering this investment. These costs are already included in the price you pay.	EUR 347
<b>Exit costs</b>	We do not charge an exit fee for this product provided that you hold the product to maturity, but the person selling you the product may do so.	EUR 0

### 5. How long should I hold it and can I take money out early?

#### Recommended holding period: 8 months

The product aims to provide you with the return described under "1. What is this product?" above. However, this only applies if the product is held to maturity. It is therefore recommended that the product is held until 25 January 2024 (maturity).

The product does not guarantee the possibility to disinvest other than by selling the product either (1) through the exchange (if the product is exchange traded) or (2) off-exchange, where an offer for such product exists. No fees or penalties will be charged by the issuer for any such transaction, however an execution fee might be chargeable by your broker if applicable. By selling the product before its maturity, you may receive back less than you would have received if you had kept the product until maturity.

<b>Exchange listing</b>	EuroTLX	<b>Price quotation</b>	Units
<b>Smallest tradable unit</b>	1 unit		

In volatile or unusual market conditions, or in the event of technical faults/disruptions, the purchase and/or sale of the product can be temporarily hindered and/or suspended and may not be possible at all.

### 6. How can I complain?

Any complaint regarding the conduct of the person advising on, or selling, the product can be submitted directly to that person.

Any complaint regarding the product or the conduct of the manufacturer of this product can be submitted in writing at the following address: Marex Financial, 155 Bishopsgate, London, EC2M 3TQ, United Kingdom, by email to: [complaints@marex.com](mailto:complaints@marex.com) or at the following website: [www.marex.com](http://www.marex.com).

### 7. Other relevant information

Any additional documentation in relation to the product, in particular, the issuance programme documentation, any supplements thereto and the product terms are published on [www.certificati.marex.com](http://www.certificati.marex.com), all in accordance with relevant legal requirements. These documents are also available free of charge from Marex Financial, 155 Bishopsgate, London, EC2M 3TQ, United Kingdom. Call +44 (0)208-050-8636 for more information.
